eZee Ultimate

Daily Operations summary with eZee Solution from Reservation to Check-out

Reservations

Walk-in or over the phone reservations for single or group can be done by staff instantly and online bookings are automatically updated in the system.

Reservation Confirmation

Once the reservation details are entered by the staff, an instant confirmation email is sent to guest or hard copy can be printed in multiple formats. Automated email confirmation is sent by the system for online bookings received from website or travel websites.

Housekeeping

Track status of all the rooms in the hotel with eZee Absolute's easy to understand GUI. Track rooms which require immediate attention and assign task to staff for quick fix pre guest arrival.

Check-in

Upon guest's arrival, the front desk staff can easily check-in the reservation right from the main dashboard. Staff can use various filters to quickly search the guests in the system by name, group name, email, confirmation no., OTA voucher no. Etc.

Group Handling

Easily organize all your reservations for group bookings; apply charges to the main folio or individual reservations. Assign color codes to specific groups for easy identification and assigning extra charges.

Corporate Clients/Agents

Create special rates and discounts for corporate clients which can be easily assigned to the folio or city ledger accounts for direct billing to the company.

Extra Charges

Predefined extra charges (inclusions) are automatically added to the room folio and other unforeseen extra charges can be added manually to the folio.

Check-out

Upon check-out, staff can apply any additional charges to the folio and accept payment in cash or credit. Furthermore, staff can easily generate a single folio for multiple rooms and split folio for a single room.

Reports

Generate multiple reports types and save them in various formats such as. pdf, .xls, .doc, etc. In addition, special reports can be generated for corporate clients and agents.

Online Distribution

Website Bookings

eZee Absolute is interfaced with eZee's Online Booking engine, allowing the system to automatically update all the bookings received from the website.

Travel Website Bookings

eZee Absolute is interfaced with eZee's Channel Manager, allowing the system to receive bookings from all the connected OTAs and GDS channels which are automatically updated in the system.

eZee iFeedback

Create your own survey with customized forms.

Comment section allows your customers to enter personal message or opinion about your product and service. The feedback forms can be generated in different languages.

Multiple report types can be generated for accurate analysis and better understanding of your customer behavior.
